DETAILED ACTION

The response filed **6/25/07** presents remarks and arguments to the office action mailed **1/27/07**. Applicants' request for reconsideration of the rejection of claims in the last office action has been considered.

Applicants' arguments, filed, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Status of claims

Claims 35-90 are pending.

Claims 1-34 are cancelled.

Maintained Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 35-51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contain new subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The term "less than frequently" is new matter. Specifically, at page 16, lines 24-25, there is a recitation "on a monthly or less than monthly" but not "less than frequently". Applicant argues that the specification states the invention (claims 35-51) "can include daily or other periodic administration of vitamin D compounds".

This however, is not viewed so, because, the phrase "less than frequently" does not apprise the skilled artisan of what "less than frequently" constitute. It still does not convey to the skilled artisan how to determine less frequently compared to a daily basis. Applicant's arguments have been fully considered but they are not persuasive for the reasons given above.

Maintained Claim Rejections - 35 USC § 112-second

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 31-36, 43-45, 52-54, 61-64, 71-74 and 82-84 remain rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

What is the lower dosage required for vitamin D to effect increase apoptosis?
And the dosage that is required without inducing deleterious hypercalcemic side effects?

Applicant argues that there are ways that are well known in the art for measuring apoptosis.

This is found unpersuasive. The dosage required to increase apoptosis without inducing hypercalcemic side effect is still missing.

Claim 35-90 remain rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

How is "less frequently than daily" defined? It is interpreted that less frequently than daily can mean once every other day, once a week, once every other month, once a year or a laundry list of other variations.

Applicant argues that a person skilled in the art would understand that the phrase "less frequently than daily" means that the vitamin D compound is not administered on a daily basis.

In response, Examiner disagrees. The recitation "less frequently than daily" can mean once every other day, once a week, once every other month, once a year or a laundry list of other variations. Because some medications are administered once a month, is "less frequently than daily" considered once a week, etc.? Careful consideration has been given to Applicant's remarks but found unpersuasive. Less frequently than daily is vague and indefinite. A doctor would never tell a patient to take a medication less frequently. There are time constraints when administering drugs.

No claims allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1614

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
